

Art classes taught by a home schooling family in Olathe:

LittleMasters...big art is an art program for children starting at age 3. Each class focuses on two masters artists, we study the technique that these artist are known for then we re-create 2 of their pieces as our own. We learn about VanGogh by painting with thick paint to create texture, we learn about Jackson Pollock by slinging paint onto a big canvas, we learn about Kandinsky by painting to music and we have a ton of fun doing it! Along with art history our students learn about color, line, space, value, texture, shape and form. Each student comes away with their own portfolio and four completed works of art but more importantly the knowledge of basic art elements and the ability to talk about a master artist and what they are known for.

Our classes are divided into 4-week sessions, at the end of each session we have a “Kids Gallery Opening” where our students get the chance to display all their hard work in a gallery setting. Pictures of the gallery are available on our website.

Please visit our site for a class schedule; we have classes during the day for our fellow home schooled kids.
